

Overview

Regular fleet maintenance and servicing are essential to ensure vehicles work efficiently and their productivity is maximized. As dealers or workshops with adequate facilities are only available in major cities, maintaining your vehicle can be a difficult task, especially when working in remote regions.

Our WORKST1 option provides a compact workstation that can be installed in a small workshop, garage or enclosed area that includes tools and equipment to carry out basic vehicle servicing and maintenance procedures such as filter changes, brake pad changes, brake fluid changes and other similar procedures or repairs.

Average lead time is 2 to 3 weeks from firm order.

Tools included
