Safety and Security essentials

The safety of the occupants and security of your vehicle are both top priorities for you. So before you drive away make sure that you have these safety essentials from TGS.

TGS carry a full line of safety products ranging from basic emergency roadside kits to fully tested roll cages.

BE SAFE!

OCCUPANT SAFETY ESSENTIALS

Roll cages

A specially constructed steel frame which has been designed, developed, tested and manufactured in conjunction with Europe's leading specialists in the field.

Tailor-made for each vehicle model, the rollcage is bolted to key areas of the vehicle. Each unit is designed to give controlled distortion in conjunction with the body shell particularly in a rollover situation. As a consequence, the roll cage provides greater protection and security to the occupants in the event of an accident by saving the vehicle body shell from destruction.

This crash-tested safety device has been proven to stiffen the chassis, which is a desirable feature in steep rough ground or uneven terrain. The roll cage does not interfere with the additional fitting of a roof rack or any extra lighting.

Vehicle security grilles

One of the most cost-effective deterrents against theft you can install on your vehicle.

These grilles are manufactured from steel with a tough polyester paint finish and will significantly reduce the risk of tool & equipment theft from your vehicle.

Features

- Strong and robust design.
- Lightweight and durable.
- Removable design.
- Safe, quick and easy to handle.

This option is available for the Land Cruiser 76, 78, 79 series, Hilux LAN/KUN25, Land Cruiser 200 series and Hiace LH/KDH202 series.

Ballistic blankets

Protects against anti-personnel mines.

One of many precautions that should be taken to increase the safety level for field staff is to install ballistic blankets in the vehicles.

The blankets are individually customized by our team of experts for each vehicle model. The lightweight material allows easy installation and facilitates the reinstallation of the original carpets and seats which results in a reduction of road and wind noise.

Leading UN agencies and NGOs have acknowledged the benefits from this ballistic protection system which prevents the impact to passengers from anti-personnel mine blasts by deflecting the effects of a detonation.

Continuous research and cooperation with worldwide experts in this field reassures us that the equipment we supply is the best in the market!

Protection Level

V50>600 m/s for 1.1g FSP according to STANAG 2920.

LifeHammer

The LifeHammer is the original escape tool designed specifically to prevent entrapment in motor vehicles in the case of roadside emergencies. This innovative tool shatters side windows and slices through jammed seatbelts with a single motion. With its luminescent pin, it is easy to find in the dark. LifeHammer is standard safety equipment for many public safety organizations.

Profilon security film

Provides unique protection in situations where the risk of having your windows broken is high.

Fitted only to the non-laminated windows of a vehicle, this product withstands attacks from bricks, clubs and other possible projectiles protecting the occupants of the vehicle.

Widely used by international organisations who operate in hostile environments. This front-line protective mechanism provides personal safety and reaction time to the occupants of a vehicle at a reasonable cost.

Protection level

The Profilon AM A1 security film is a multi-ply laminate film with a thickness of 360 μ . Glass fitted with Profilon AM A1 meets the resistance specifications of Class A1 of DIN 52 290, P2A of EN 356 and UL 972.

Profilon AM A1 is:

- impact-resistant (incendiary devices, projectiles, catapults, etc.)
- explosion-resistant
- resistant to break-in (with hammers, etc.)
- splinter-bonding
- UV-absorbent

VEHICLE SECURITY ESSENTIALS

Visual deterrents

While not foolproof, anti-theft devices can stop the amateur thief and slow down the professional. The longer it takes to steal a car, the more attention the thief attracts, and the more likely the thief will look elsewhere.

All vehicle theft prevention equipment helps deter criminals. They effectively protect your vehicle from burglaries and vandalism. Consider adding some or all of the anti-theft devices listed below to help protect your vehicle.

Mul-T-Loc transmission lock

A world-renowned anti-theft mechanism manufactured from the finest hardened steel ensuring long-lasting mechanisms which are carefully crafted to withstand theft attempts. It prevents thieves from driving the vehicle away by immobilising the 4WD lever in neutral position. The Mul-T-Lock transmission lock cannot be removed making it a very effective anti-theft device.

Window etching

This very useful security service allows the customer to have all the edges of the windows of the vehicle etched with identification markings.

A distinct serial number of the organisation's or client's choice with a maximum of seven digits that will differentiate your vehicle from all the others, helping to identify and recover vehicles which may have been stolen.

Furbolock

This highly visible bright yellow steel tube is both cut-proof and drill-proof. It has a lock which attaches horizontally across the top of the steering wheel. The Furbolock has been especially designed to prevent the steering wheel from being turned. It also acts as a visual deterrent for thieves looking in car windows.

Easy to store, simple to use and almost impossible to cut through! These features make this a valuable security device yet another essential that you shouldn't go without.

Locking wheel nuts

Made of hardened steel, locking wheel nuts bring extra security to your vehicle. Put simply, they help prevent your wheels from being stolen! The kit contains four wheel nuts and a special key. They bring you a simple, inexpensive, yet effective way of keeping your wheels where you want them: on your car! Thieves will move on and try to find something a little easier!

Transit safety box

To deter theft in transit, a transit safety box is recommended to store easily removable items such as:

- headrests
- ashtrays
- windscreen wipers
- control/lever knobs
- gear knobs
- outside mirrors
- cigarette lighter
- jack
- tool kit
- touch up paint
- Codan antenna (where applicable)

(please note that these items will vary depending on model)

Once packed, the box is secured with a padlock and chained inside the vehicle.

Remote control alarm

Specially adapted and wired for our Toyota range, this LaserLine alarm, once activated, offers full protection for all doors, bonnet and the boot. Any movement inside the vehicle interior is detected by means of the ultrasonic sensors. Any interference with the vehicle will cause the indicators to flash, activate a 126 decibel siren and totally immobilise the vehicle by switching off the electrical power from the starter motor and ignition switch.

This alarm is easily activated and deactivated by a remote control unit or by the coded keys provided. LaserLine alarms have an excellent reputation for reliability in all conditions.

BASIC SAFETY PACK (EMERGENCY ROADSIDE KIT)

This all-in-one safety pack includes all the key equipment you'll need to deal with first-aid emergencies, breakdowns and road accidents.

1 Warning triangle

A highly visible hazard warning device, which clearly alerts other drivers of impending danger from an accident or breakdown situation. This device is particularly useful at night.

2 Fire extinguisher

Your faithful travel companion in fire emergencies. This option allows a fast response to in-vehicle electrical or engine fires. In some countries, vehicles are required to carry extinguishers. A protective one kilo capacity security device you should not leave home without!

3 High visibility vest

High visibility reflective safety vest for added personal protection. It dramatically increases the chance of being seen by all motorists on the road.

4 Tow rope

This high quality and highly resistant rope attached to a tough heavy duty hook could get you out of just about any situation! Be equipped in case of a recovery to aid yourself or others.

3000kg rolling load capacity

5 First aid kit

Providing you with the first response materials you need to deal with injuries. This basic essential motorist kit comes as recommended by the British Red Cross and includes:

Description	Quantity
First aid guidance card	1
Assorted airstrip plasters (pack of 10)	1
Sterile eye pad with bandage (8cm x 6cm)	1
Calico triangular bandage (127cm x 90cm)	2
Safety pins (pack of 6)	1
Medium sterile wound dressing (10cm x 8cm)	2
Large sterile wound dressing (13cm x 9cm)	1
Ambulance dressing pad (8cm x 7cm)	2
Sterile dressing pad (10cm x 10cm)	2
Sterile cotton wool (15g)	1
Conforming bandage (8cm x 4cm)	1
Dressing strip (6.3cm x 15cm)	1
Tough cut scissors	1
Cleansing wipe (pack of 10)	1
Personal protection (pack of 2)	1
Windscreen first aid sticker	1
