

# FLEET MANAGEMENT

## ABOUT

A focus on practical and administrative vehicle fleet management principles using the application of key performance indicators that is relevant to your organisation.

## TRAINING METHODS

Our Fleet Management courses adopt the following training methods, classroom-based, demonstrative, interactive, hands-on, social learning and where appropriate, online learning.

## QUALITY ASSURANCE

Our courses have been endorsed by the manufacturer Toyota. Toyota supports our expertise and believes that our courses contribute to vehicle longevity by adopting the correct usage of the vehicle.

Toyota Gibraltar Stockholdings had been accredited Investors in People Platinum demonstrating that our organisation leads, supports and develops our people. This concept is also implemented in our 4x4 driver courses.

Additionally, TGS has acquired ISO 9001 a global standard for quality management systems that helps organisations meet customer and regulatory expectations. TGS is also ISO 14001 certified excelling in the global standard for environmental management systems that helps organisations reduce their environmental impact and improve our sustainability.

## LEARNING OUTCOMES

- Best practice for fleet management key performance indicators •
- Implement a 7-step approach to fleet management •
- Use of tracking systems and data analysis
- Enhanced fleet related decision making •

## BENEFITS

Choosing our fleet management courses brings benefits to your organisation:

- Implement efficient approach to fleet issues •
- Improve longer life span of vehicle •
- Reduce running costs to make significant savings •

## TESTIMONIALS

"I would recommend the training for all the staff involved in fleet management and in an advisory capacity." Paula Donooc, Concern

"I strongly recommend this training to every NGO fleet manager and also all the humanitarian drivers" Aeneas Mutumba Settuba, Save the Children
