

Safe Drive Certification

Toyota Gibraltar Stockholdings (TGS) Training Department has been working for more than 20 years providing different types of technical training for the aid sector. We collaborated with **Bioforce Institut** and **Fleet Forum** to work on a specific course that recognises the competencies of a driver working in the aid sector.

Bioforce is one of the leading institutes in Europe specialised in the professionalised competencies for aid workers since 1983. For the last 16 years, TGS has been involved in different training sessions for the Logisticians and Program Managers as participants following the courses at Bioforce. We have been involved in the technical training, mechanical, off-road driving, recovery and fleet management.

Bioforce has been involved with the Quality Assessment & Learning Centre (QALC) created specifically for the aid sector. The objective of the

QALC is to create recognised, quality assured standards for humanitarian learning and assessment.

In November 2016, Fleet Forum conducted a survey with some of the Global Fleet Managers in the aid sector to help to define the main competencies of a driver for the humanitarian community. Bioforce, Fleet Forum and TGS collaborated further and this led to TGS formulating a course with competencies for a professional driver in the aid sector.

Separate to the Safe Drive Certification, the collaboration centre was working on the creation of these standards that took place from 2017 to 2019. This program included Bioforce, RedR UK and Pearson. They have been working and collaborating to contribute two main documents of the HPass strategic goals. Bioforce has been part of this project and has been recognised as a centre that delivers quality training courses following the HPass principles.

TGS designed a specific course including some of the main driver competencies. For the last 2 years, TGS has gone through all the process to be evaluated and certified a HPass. Bioforce had also participated to engineer the course criteria and evaluation process.

Today, the Safe Drive Training that TGS delivers is certified by Bioforce Institut and acquires the HPass criteria, in partnership with the Bioforce Institut.
